

ENERGY TRANSFER IN COLLISIONS

SCIENCE TALK MAT

Question: What happens when objects collide?

1 OBSERVE

What happened?

I observed _____.

In Trial ____, I saw/heard _____.

2 FIND A TREND

What pattern did you notice?

Across our trials, I noticed _____.

A trend in our results was _____.

3 MAKE A CLAIM

What do you think the results show?

My claim is: When objects collide, _____
_____.

4 USE EVIDENCE

What makes you think that?

My evidence is _____.

In Trial ____, we observed _____.

5 CONNECT YOUR REASONING

How does the evidence support your claim?

This evidence supports my claim because _____.

WORD BANK

collision variable trial observation trend
evidence energy transfer motion moved
stayed still faster slower sound

PARTNER TALK

Partner A:

My claim is _____ because we
observed _____.

Partner B:

What evidence supports your claim?

BEFORE YOU SPEAK

[] Sketch your idea

[] Rehearse with a partner

[] Plan in a home language if helpful
